Plantation, FL 33313

To Whom It May Concern:

Having had a couple other consultants come and evaluate our clinics, we were slightly skeptical. We have three clinics at this time with a fourth on the way in a little over 4 years. However, when Steve Levine of RCRI came into our clinics, it was no comparison. He provided insights that no other company did and above all did so from a physical therapist/ clinic owner perspective. He analyzed our clinic from intake procedures to documentation and billing. He then broke down these areas in a clear and detailed manner, providing us with a game plan on how to improve our clinics. His clinical and reimbursement knowledge allowed him to conduct chart reviews that were extremely valuable.

We at Beachside PT take our patient care and documentation very seriously and through Steve's help we have truly created a more efficient and compliant office. Our staff can rest assure that we will not only provide high quality care but back it up with exceptional documentation. Steve provided the steps to bill more efficiently and implement a daily note that is more compliant with the recent Medicare documentation changes.

I can't thank Steve enough for his help and suggestions for the improvements of our clinics. Hopefully his feedback will allow use continued growth and quality of services.

Sincerely,

Christopher Wicker PT, DPT, OTR/L  
Vice President of Operations
